I can't start the game because the menu button isn't working,

I want to play game, so plz fix it as soon as fast.. I really enjoy this game. Even though it's only an indie, it has a nice story behind it, so it kind of makes up for other aspects. I would definitely recommend this to anybody that doesn't usually play these type of games.. I drove to work on Friday and I realized I had a half day...as I was heading in the parking garage I found myself running around with a shotgun and M-16 killing zombies.. Initial impressions from a moderately experienced rhythm boy.

The Good

Song selection seems decent, even without the DLC.

Keysounds! Pleasant keysounds!

Easily remappable keys.

You can adjust your hit position as well as judgement, though it might not even be necessary (see The Bad.)

The Bad (?)

Timing is very lenient, it's not hard to get exact timing (or pgreats or whatever you wanna call them), I found it even looser than something like osu mania. This could be nice for people new to VSRGs, but if you like a bit of challenge with your timing it could be a little annoying.

There's lots of distracting graphics on the side of the playfield that don't really seem to serve any purpose aside from being just that, distracting.

As far as I can tell, the highest available difficulty at the moment is Lv 10, which isn't all that hard, I'd say it's comparable to around 3.5*~ osu mania maps or about 12~ StepMania charts.

There's no leaderboards or rankings,

That said, for the cheap price, it's a plenty playable game and probably more enjoyable than osu mania because keysounds and charts that actually rhythmically make sense. Might update this after I play some more, and if I buy the Forever Friends DLC.. The gameplay is great, however this is not the best part about the game, the best part would have to be the dev team, who are extremely active and helpful on their discord. Even before purchasing, I joined the discord and was able to speak to a dev who explained the view they had for the game. Def worth getting. 10/10.. Nice little relaxing casual game. The series is really fun and well thought-out. The art is amazing and I definitely recommend it if you want a break from shooting stuff all the time.. Pretty bad turns into a shootout way to quick. Tanks make it fun for a while but then it just quickly turns to a slog.
. Max Payne's ugly little brother no one knows from 2006 is now available on steam! Do you need this game? If you completed the Max Payne Trilogy, yes.
If not, play the New York Cop shootouts first and then enjoy this B-Movie Max Payne.

You play as Victor Corbet, a DEA Special Agent that is being sent to southamerica to fight against a drug cartel. The cops down there don't like you at first, they give you the name matador, you shoot a lot of bad guys, a few traitors are also in the "plot", the game is straight forward (like Max Payne 2, same Engine by the way) with a lot of stupid bad guys to kill.

Don't expect some revolutionary gameplay, smart AI or even a balanced difficulty.

This game got B-Movie written all over it, but that's not a bad thing actually. The game was pretty funny when I've played it over a friend's place in 2006 and it is still a fun game today.

This is the first time I have wished that there was a Neutral button for a review.

The Good:

This game has a great story that pulls you in, a great atmosphere that gives some genuine chills, some well done puzzles and the objects that you need to find to use to progress make sense.

The Bad:

A very abrupt cliff-hanger ending that leaves your heroine in peril with no sequel in sight. :-(It leaves you feeling as though you are missing two thirds of the game.

Conclusion:

Although I enjoyed what there is of it, I was very glad that I didn't pay the full price. If you enjoy hidden object games then you will enjoy this one but buy during a sale and be prepared to be very annoyed with the abrupt ending.. While the idea behind this game is quite appealing, the game itself is repetitive and boring.. This game has no feeling at all, motogp 08 is still the best and has the best sound aswell. The sound that the bikes have in this game sounds like a early 2000's rallycross game. worthless. cmon milestone, you can do better than this!. I bought the game so I could buy this DLC. Give them beer asap.. Game is pretty good. Ignore alot of the bad reviews. The game got review bombed by old star control players because of a copyright argument
